An Annotated Booklist of Literature to Promote Positive Aging
(Preschool-Third Grade)

Dr. Sandra L. McGuire
Professor Emeritus
University of Tennessee, Knoxville

Director
Kids Are Tomorrow's Seniors (KATS)

About the Author:

Dr. McGuire is an advocate for combating ageism and promoting positive aging. Positive aging encompasses attitudes, lifestyles, and activities that maximize the potentials of life's later years and enhance quality of life. She has presented at conferences and published in journals including: *Childhood Education, Journal of School Nursing, Educational Gerontology, Journal of Health Education, and Creative Education*; books including: *The Encyclopedia of Ageism* and in *Violence, Neglect and the Elderly*; and in the federal Education Resources Information Center (ERIC) system. Dr. McGuire is a co-author of a 6th edition community health nursing text where she contributed information on healthy aging and working with older adults in the community. She is a Professor Emeritus at the University of Tennessee, Knoxville, was an Assistant Dean and Professor (Caylor School of Nursing) at Lincoln Memorial University, and is a Fellow of the Association for Gerontology in Higher Education (AGHE). She serves on the AGHE K-12 and Intergenerational Committees and the AGHE award for *Best Children's Literature on Aging* Subcommittee. Dr. McGuire is director of the Kids Are Tomorrow's Seniors (KATS) program and served as a member of AARP's National Policy Council. Her annotated booklist: *Growing Up and Growing Older: Books for Young Readers* is available, free online at <http://library.lmunet.edu/booklist>. Contact Dr. McGuire at smcguire@utk.edu

About the Booklist:

The booklist is an effort to use early children's literature to combat ageism, promote positive attitudes about aging, and start children on a path to positive aging. Worldwide people are living longer and combating ageism is important to everyone. In the U.S. a child can expect to live to be 80, 90, or 100 years old.¹ Unfortunately, research has also shown that even young children evidence ageist attitudes.

Ageism is prevalent in the U.S. and other societies. Ageist attitudes tend to become self-fulfilling prophecies and impact the quality of life experienced as an older adult. According to Yale researcher, Dr. Becca Levy, negative age stereotypes tend to become internalized across the life span, can operate unconsciously, gain self-relevance, and have psychological, behavioral, and physiological impacts.² The research of Levy and others has shown that ageist stereotypes and attitudes are predictors of a number of adverse outcomes in old age and that positive, nonageist attitudes can help to combat these adverse outcomes. Older adults with more positive attitudes about aging have a lower prevalence of psychiatric conditions, more resilience when encountering stressful events, better recovery from disabling events, and are living longer than their counterparts who do not. In recent years, ageist attitudes and stereotypes have been shown as risk factors for cardiovascular events later in life and as a predictor of Alzheimer's disease biomarkers.

The images of older adults in children's literature play an important role in attitude formation.

The booklist is a compilation of carefully selected children's literature that contains positive, meaningful portrayals of older adults. Books on the booklist portray aging as: 1) a natural and lifelong process of growing and developing, 2) present similarities between young and old, 3) show young and old enjoying each other and learning from each other, and 4) view older adults as valuable and contributing members of society. Books that focus on death, dying, disease, disability, dependence, and dementia are not included on this list. These topics are not synonymous with aging.

Booklist books help children see their "elder within"³ (the older person they can become), see the potentials of aging, and think in terms of "lifespan activities" (activities they can do now and can do as an older person--like reading, writing, art, dance, music, theater, traveling, hobbies, and sports). The books can stimulate interesting discussions about aging, help children learn about growing up and growing older, and start planning for the long life ahead of them.

The booklist starts with: 1) a table of *Favorite Books-in-Print*, 2) a listing of annotated *Books-in-Print*, 3) a listing of annotated *Favorite Out-of-Print* books, 4) a table of *Stories with Multicultural Content*, and 5)

a table with a *Topical Listing* of booklist books. Out-of-print books are often available through libraries or vendors. Many booklist books are available in multiple formats including eBooks.

Other Resources for Early Children's Literature and Aging

In 2009, The Association for Gerontology in Higher Education (AGHE) started the award for *Best Children's Literature on Aging*. This award highlights recently published books with positive portrayals of aging. Books receiving AGHE awards in the preschool-primary age range are: *Pappa Chagall, Tell us a Story* (Anholt), *Rock, Brock and the Savings Shock* (Bair), *Shoebox Sam* (Barrett), *Sometimes its Grandmas and Grandpas and Not Mommies and Daddies* (Byrne), *Nana in the City* (Castillo), *The Golden Rule* (Cooper), *Ain't Nobody a Stranger to Me* (Grifalconi), *Marching With Aunt Susan: Susan B. Anthony and the Fight for Women's Suffrage* (Murphy), *Niwechihaw/I Help* (Nicholson).

The *A is for Aging, B is for Books* website by children's book reviewer and author Lindsey McDivitt (<http://www.lindseymcdivitt.com>) is another resource. McDivitt provides reviews on children's books with positive aging content and notes "Positive aging picture books stay away from narrow portrayals of older adults and acknowledge the variety of interests, abilities, and talents that do not melt away with old age, but grow with experience."⁴

Authors who have consistently portrayed older adults in a positive, meaningful way include Eve Bunting, Amy Hest, Patricia Polacco, Cynthia Rylant, Harriet Ziefert, and Charlotte Zolotow. You may want to explore their publications.

Some Things to do:

- Review your attitudes about aging. Ageist attitudes are contagious!
 - When sharing booklist books with children highlight the potentials of old age and activities the older adult is involved in. Refrain from promoting ageist stereotypes
- Contact your local schools and libraries to make sure these books are available
- Contact authors and publishers about the need for children's books that promote positive aging
- Purchase and share books with children that promote positive aging
- Encourage intergenerational experiences that include older adults and children
- Be a role model and advocate for positive aging

Children need to understand that there is great potential for good health, activity, happiness, and creativity at all stages of life. A foundation for positive aging needs to be established when people are young. Carefully selected children's literature can help to lay a foundation for positive aging and promote quality of life for both today's and tomorrow's elderly—of which today's children will be a part. "Only as children view their own aging and the elderly positively will they be able to achieve the life, liberty, and pursuit of happiness that are considered rights of each in our society."⁵ This is a legacy worth leaving.

They can help children grow up with open minds and open hearts and help to make the world a better place. Book notes that grandparents love, listen, teach, encourage, explore, share culture and tradition, provide caregiving, tell good stories, celebrate, read and play with children. The epilogue to the book encourages grandparents to play with grandchildren, celebrate the past, record memories, plan an adventure, and help children learn about their families.

Two children visit their grandfather the famed artist, Marc Chagall, at his farm. When they arrive he is painting in his studio. He shares with his grandchildren stories of his life. He started painting as a child and continues to paint as an older adult. His imaginative paintings have things like a pink goat, a green man, purple cows, and flying people. People loved these paintings and say they made them happy. The children express they wish they could fly like the people in the paintings. He tells his grandchildren, "In your imagination and in your paintings and in your dreams you can fly as high as you want". He shares stories of his life with them like how he and his wife came to American to escape the war in Europe.

Illustrates growing up and growing older, family history, the lifespan activity of painting, an active grandfather who is still working, and young and old enjoying and learning from each other.

When a beacon was built at the end of a 1500 foot catwalk, Harriet walked each night to light the beacon in addition to lighting the lighthouse. Later the beacon was moved to a peer that was 500 feet farther out. Harriet now rowed to that beacon each night to keep it lit. When Harriet was 80, she was still working the lighthouse. The people now called the lighthouse “Miss Colfax’s Light” and ship captains called it “old Faithful”. Miss Colfax’s Light protected ships and sailors. She carried out her lighthouse duties through crashing waves, blizzards, storms, and extremely harsh weather. In 1904 the lighthouse was replaced by a modern lighthouse and Harriet retired from her lighthouse duties at age 80.

Topical Listings

This listing assists in finding topics of interest to the reader. If you find the listing helpful or have topics to add please let me know (smcguire@utk.edu)

Books for young children with older adults frequently focus on the role of grandparent and the older adult in a family setting. Children need to see that, as older adults, there are roles for them other than grandparents. More children's books need to include older adults in diverse roles and settings.

Unfortunately, many topics such as older adults as leaders, volunteering, work, retirement, travel, companionship, fitness, marriage, lifelong learning, lifelong planning, and lifelong saving are not often mentioned in this literature. Content areas such as Social Security, Senior Olympics, Senior Centers, Medicare, Area Agencies on Aging, Administration on Aging, National Institute on Aging, Road Scholar (formerly Elderhostel), Older Americans Month, Older Americans Act, and Intergeneration Month are missing.
